

Fun, developmentally enriching classes for infants through age 6.

Every child is born with potential gifts and talents that are only realized with the appropriate stimulation and guidance. The earlier this stimulation and guidance occur, the greater the chances your child will reach his/her full potential.

Thinkertots' cutting edge curriculum and warm, nurturing environment provide these necessary ingredients. If your child is newborn to six years old, we have the perfect program.

Since children need language to think, create and interact, language development is emphasized at all levels. In small age appropriate classes, your child will be stimulated and challenged. Our curriculum employs Multiple Intelligence strategies to help promote the development of:

- Logical thinking & problem solving skills.
- Reading, spelling & numeric abilities.
- Speech and language development.
- A joy for learning & communication.
- Self-confidence and a positive attitude.
- Healthy social and interpersonal skills.

"THINKERTOTS offers a safe environment with just the right amount of stimulation. Meir loves it all at THINKERTOTS."

Simone, mother of Meir

Thinkertots has been featured by Fox News Channel's "Fox and Friends", "The New York Daily News", "Long Island Newsday" and other media.

NEW! KINDERDANCE®

(2 - 12 yrs.) All Kinderdance programs stress development of physical and language skills, imagination and socialization while building self-confidence and a positive self-esteem. Children learn creative movement, ballet, tap, gymnastics and modern dance skills while also learning colors, numbers, shapes, words and songs.

NEW! Spanish Immersion Workshop
(18 - 36 mos., 45 min., 3.5 - 8 yrs., 1 hr.)

Your child will learn Spanish naturally through playful interaction and entertaining full immersion (English translations are not used in class). Led by native Spanish speaking teachers, the thematic based curriculum and classes are specifically designed for children.

Smart Programs for Kids®

Pre-Nursery (0 - 4 yrs., 45 or 75 minutes)

While accompanied by a caregiver, your infant, toddler or pre-schooler will be introduced to education through a variety of exciting and stimulating activities. We offer age specific classes in music, art, movement and general studies. All activities are designed to challenge higher-level thinking while increasing confidence and creativity. Our **BabySmart** and **Start-Me-Smart** offer a variety of fun learning activities, such as puzzles, puppets, blocks or shape sorters, songs and more. **BabySmart** introduces communication through sign language; **Start-Me-Smart** encourages verbal communication.

For children 24 - 48 month's we offer **SuperSmart**, an extended class of 75 minutes. This multi-discipline class is ideal for children who aren't quite ready for our Nursery and Pre-K Drop-Off classes. Since All children learn differently and their mental development is stimulated in various ways, we highly recommend taking at least two different class types to start. We have made it very easy to do this. While each class type has a separate theme the objective is always the same, stimulation and encouragement of mental development.

Or if you prefer in depth concentration, we have music, art and movement classes. **MusicSmart** is designed to stimulate your child's musical aptitude and a life-long love of music. Activities include singing, musical games, rhythm exploration, dancing, instrument play and musical storytime.

ArtSmart encourages creativity, imagination and self-expression. Meanwhile your child will develop fine motor skills through activities such as cutting and pasting. **Movin'Smart** classes develop gross motor skills and promote balance, coordination and creative movement.

BigKids Classes®

Nursery, Pre-K & Enrichment (2 - 6 yrs.)

BigKids Nursery (2 - 3.5 yrs., 2 or 2.5 hours)

Your child will take his/her first step towards personal and intellectual independence in our Nursery Classes. Your child will learn important socialization skills such as following a routine, taking turns and good manners. Art projects have scientific and other educational themes. Storytime selection includes new authors and classic literature. Our use of learning stations allows the children to choose from among various stimulating activities ranging from books and puzzles to building blocks, etc. Our Nursery classes provide all the necessary ingredients to stimulate your child's intellectual development.

BigKids Pre-K (3 - 5 yrs., 2 or 2.5 hours)

Your child will develop concepts of pre-reading, pre-writing, mathematics, science, social studies, literature, art, music and more. Pre-reading includes recognizing letters and simple sight words. In pre-writing they begin writing letters and work up to their names and simple words. Math concepts are introduced through manipulatives. In science, we introduce weather, the 5 senses and other concepts. Our Pre-K puts your child well on his/her way to developing a love of learning.

BigKids Art & Reading (3 - 6 years, 2 hours)

Children explore artistic techniques through watercolor, pencil, crayon and pastels. They learn to appreciate works of famous artists and learn step-by-step techniques to drawing. In the reading hour, we read and discuss classic children's stories with an emphasis on vocabulary and reading comprehension. The reading skills your child develops here will put him/her well on his/her way to becoming an avid reader and excelling in school.
